

ECO - FRIENDLY

PRODUCTS

REUSE

Re-useable product reduces our impact on the environment. Rather than wasting plastic and landfill resources with single use plastic bottles, shopper bags and paper coffee mugs, we are encouraged to purchase re-useable products.

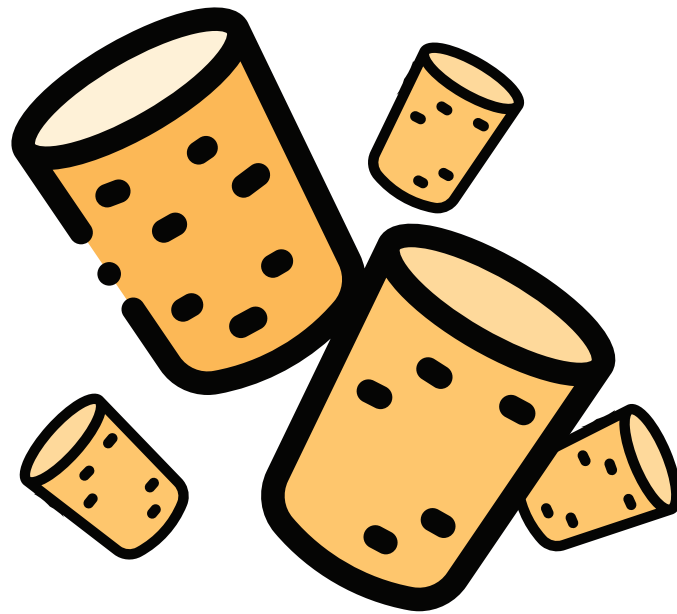

RECYCLE

Recycled products are a growing trend world wide.
Re-cycled products range from clothing, towels, paper and
board and bags.

BAMBOO

Bamboo is far more environmentally friendly than other alternatives. Bamboo is fast-growing and sustainable in both cultivation and harvest. This wonder material is ideal for excellent promotional materials across the board.

CORK

The cork industry is regarded as environmentally friendly and sustainable. The cork tree is not cut down to obtain the cork; only the bark is stripped to harvest the cork. The tree continues to live and grow. Cork is 100% biodegradable.

WHEAT STRAW PLASTIC

Wheat straw is the stalk left over after wheat grains are harvested. Traditionally, it has been treated as a waste. ...

We reclaim this material and use it to make our wheat straw products. Our wheat straw fibre products contain a minimum of 30% wheat fibre and the balance is PP, resulting in a product with a long life, while substantially reducing plastic use. BPA free and dishwasher safe.
